Detail oriented Web Developer and **Systems Operations Specialist** with over 2 years of experience **managing, updating, and optimizing software** applications. Experience in **PHP Laravel, MySQL**, and workflow automation, with a strong ability to **leverage AI tools** and Google Apps Script to streamline data pipelines and eliminate manual processes.

WORK EXPERIENCE

Web Developer (Full Time)
Paperless Hospital

Sep 2024 - Present
Palembang, Indonesia

- Client: Lampung (Jan 2025 – Present)
- Designed a **reliable internal application** optimized for slow and unstable internet environments
 - Built **automated system & network monitoring**, eliminating repetitive manual checks
 - Implemented **real-time system up/down monitoring** and **internet connectivity alerts**, reducing response time by **>50%**
 - Optimized **20+ legacy SQL queries**, reducing critical page load time from **29s to 3s (~10x faster)**
 - Secured server access using **Tailscale (private mesh VPN)**, preventing unauthorized external access
 - Diagnosed and resolved **20+ critical system bugs** (e.g., **wrong query SQL, API timeout errors, Controller errors**) within **SLA deadlines**, ensuring **99.9% uptime** for hospital operations.
 - Enhanced system performance by reviewing and optimizing **20+ outdated SQL queries** in the **hospitalization module**
 - Reduced **data listing load** time from **29s to 3s (~10x faster)** through **query optimization** and **pagination** implementation.
 - Leveraged AI tools** and **Google Apps Script** to **automate monthly IT reporting** workflows, reducing manual data compilation time and eliminating data entry errors.

- Client: Palembang (Aug 2024 – Dec 2024)
- Adapted rapidly in a **high-pressure production environment**
 - Ensured **minimal service disruption** by providing **fast response** to **production issues** during **active hospital operations**.
 - Developed a **data audit feature** with **change history** and **error logs**, enhancing **error detection efficiency** by **3 times**.
 - Proactively identified and solved **communication gaps** in **dev workflow** by introducing **automated commit alerts**, increasing **team productivity by 30%** as measured by **completed monthly tasks**.

Platform Ops (Intern)
Apiary Academy

Feb 2023 - Oct 2023
Jakarta, Indonesia

- Collaborate closely with the Program Team to create **3+ projects per month**, ensuring an **end-to-end user flow** and an **excellent learning experience** for the **50+ students**.
- Design, develop, and manage **5+ landing pages** on **no-code LMS software**.
- Optimize the flow of more than **2 tools** to improve the Platform Ops team's productivity.
- Managed and completed **100%** of assigned tasks ahead of schedule and projects within designated deadlines
- Input data for **daily reports** and **student records**.

EDUCATION

Bachelor Degree of Informatic
Universitas Teknokrat Indonesia

Sep 2019 - Dec 2023
GPA: 3.42

- Relevant Coursework
- Web Design**, learn static web design and development using HTML, CSS and Javascript.
 - UI/UX Design**, Designing user interfaces for web, mobile & desktop, focusing on user.
 - Web Programming**, Covers core web programming concepts, hands-on PHP development for dynamic web applications, and implementation of Laravel Frameworks.

SKILLS

Office Tools: Excel, Word, Google Docs, Google Sheet

Tools Coding: Visual Studio Code, PHPstorm

Soft Skills: Problem Solving, Team Work, Communication, Persistence, Collaboration

Software Design: Figma, Corel Draw, Photoshop, Inkscape

Programming: Javascript, Laravel, Jquery, SQL, Tailwind, Bootstrap, Linux, Golang, Git, Python, PHP, Rest API

Hard Skills: Fast Typing, Data Entry, Research Skills, Tech Savvy

AI: AI-Assisted Automation, Prompt Engineering, Workflow Automation

System Administration and Deployment: Linux, SSH, Monit, Fail2ban, Docker

LANGUAGES

Indonesia (Native proficiency) • **English** (Limited working proficiency)

ORGANIZATIONAL & VOLUNTEER EXPERIENCE

Organizer	Apr 2022 - Present
UXiD Lampung	Bandar Lampung, Indonesia
- Managed monthly events and planned for community standards, resulting in increase in attendance and positive feedback from participants. - Designed and published design posters and feeds for Community Social Media Instagram

PROJECTS

Paperless NGX (VPS) 	Feb 2026 - Present
Engineered a self hosted Document Management System (DMS) on a personal VPS using Paperless-ngx to centralize digital archiving. Automated document indexing and text extraction utilizing OCR technology to streamline full text search efficiency.	
Uptime Kuma (VPS) 	May 2025 - Present
Architected a real time service monitoring infrastructure on a personal VPS utilizing Uptime Kuma to track server uptime. Streamlined incident response by integrating automated downtime alerts with instant messaging platforms for proactive management.	
RSS Feed Extension 	Jul 2025 - Aug 2025
Browser Chrome Extension	
Built a Chrome extension using JavaScript to monitor RSS feeds and notify users of content changes. Designed a customizable monitoring system with support for multiple URLs, check intervals, and optional CSS selectors. - Developed a clean, user-friendly interface for managing feeds and alerts. Replaced dependency on unsupported tools (e.g., Feedbro) by providing an alternative, lightweight solution for real-time feed tracking. Optimized workflow efficiency by delivering real-time notifications for critical development updates and customizable web feeds, reducing manual tracking time significantly.	
PLUT - Bandar Lampung 	Sep 2023 - Mar 2024
UMKM Mentoring System Information	
Designed and implemented the database schema to efficiently manage mentoring session and mentor data. Developed a comprehensive web application for Mentoring using HTML, CSS, JavaScript, and Laravel. Simplify mentor-student workflows by developing a website that digitizes manual processes, enabling efficient scheduling, communication, and progress tracking.	
PKBM Budi Mulia - Banten 	Sep 2023 - Jan 2024
Learning Management System Based on Preferences	
Developed a tailored Learning Management System (LMS) for PKBM Budi Mulia, designed to enhance educational experiences by aligning with user preferences. Designed and implemented a database to manage student information, course materials, and user preferences. Enabled personalized learning for high school students by developing an LMS that customizes content—PDF modules or audio-video—based on initial assessment quizzes, improving engagement and learning effectiveness.	
Universitas Teknokrat Indonesia - Bandar Lampung 	Jul 2023 - Nov 2023
Management Event System	
Developed a Laravel website to store, display, and manage events and Implemented user auth and event management for attendee. Designed and implemented a database mysql to manage university event. Consolidated multiple event processes into a single platform by developing a university Event Management System, replacing separate tools like Google Forms and social media posts with integrated registration, confirmation, and publication features.	

PUBLICATIONS

Implementation of a Website-Based Event Management System at Universitas Teknokrat Indonesia Using Laravel Framework Jan 2024 and Tailwind CSS Framework  on Universitas Teknokrat Indonesia
Designed and evaluated a website-based event management system prototype for Universitas Teknokrat Indonesia using Laravel and Tailwind CSS. Research testing demonstrated that the system can accelerate event publications and automate attendance tracking to improve operational efficiency.
